

MANJIMA S B

Data Scientist | AI/ML Engineer | Python Developer

Location: Bengaluru | Contact: +91 9843476920 | Email: manjimasb07@gmail.com | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Recent Electronics and Communication Engineering graduate (2025) with internship experience in Data Science, Artificial Intelligence, Machine Learning algorithms and Python Development. Passionate about building AI-driven solutions to solve real-world problems. Strong analytical, problem-solving, Communication, and Collaboration Skills, seeking an entry-level opportunity in AI/ML Engineering, Data Science, or Python Development.

TECHNICAL SKILLS

- **Programming Languages:**
Python, SQL, JavaScript, C, C++
- **Data Science:**
Pandas, NumPy, Exploratory Data Analysis (EDA), Data Cleaning, Statistical Analysis, Data Visualization, Feature Engineering, Feature Selection, Hypothesis Testing, ETL Workflows, Data Pipelines, Data Manipulation, Matplotlib, Seaborn
- **Machine Learning:**
Scikit-learn, Supervised Learning, Unsupervised Learning, Classification, Regression Analysis, Clustering, Predictive Modeling, Ensemble Learning, Cross-Validation, Hyperparameter Tuning, Model Evaluation
- **Deep Learning & AI:**
TensorFlow, PyTorch, Deep Learning, Neural Networks (ANN, R- CNN, RNN), Reinforcement Learning
- **Natural Language Processing:**
Natural Language Processing (NLP), Text Classification, Named Entity Recognition (NER), TF-IDF, NLTK, spaCy, Prompt Engineering, LangChain, Retrieval-Augmented Generation (RAG), Vector Databases
- **Web Development:**
Django, Flask, HTML5, CSS3, Bootstrap 5, REST APIs, FastAPI, MVC Architecture, SQLite3
- **Tools & Platforms:**
Git, GitHub, Docker, Jupyter Notebook, MS Excel, VS Code
- **Software Engineering:**
Object-Oriented Programming (OOP), SDLC, Debugging, Version Control, CI/CD Pipelines, AWS Basics

INTERNSHIP

Data Science & AI Intern

Agileinfo Techytern Solutions LLP, Trivandrum | 11 April 2025 – 30 Mar 2026 (Completed)

- Developed **3+ AI-based applications** using Python to automate business processes and solve real-world problems.
- Performed data preprocessing, cleaning, feature engineering, and exploratory data analysis on **large datasets 5000+ records** to improve model performance and business insights.
- Built and optimized statistical and machine learning models including Random Forest, Decision Tree, and XGBoost, achieving over 85% prediction accuracy.
- Collected, cleaned, transformed, and analyzed structured datasets for machine learning workflows.
- Contributed to model validation, ETL workflows, Git version control, and technical documentation while collaborating on real-world AI projects.

Python Full Stack Developer Intern

Agileinfo Techytern Solutions LLP, Trivandrum | Nov 2024 – Mar 2025 (Completed)

- Built and deployed **2 responsive full-stack web applications** using Python, Django, HTML, CSS, Bootstrap, JavaScript, and SQLite.
- Integrated **4+ REST APIs** to support backend functionality and data exchange.
- Managed CRUD operations and query optimization, reducing data retrieval time by approximately **20%**.
- Improved application reliability by following software development best practices and debugging techniques.

- Implemented **3+ embedded and IoT prototypes** using Arduino Uno and sensor modules.
- Experimented multiple sensors and microcontrollers for real-time monitoring and automation applications.
- Completed system testing and debugging, reducing functional errors and improving system reliability.
- Prepared technical documentation and implementation reports for project deployment and knowledge sharing.

PROJECTS

AI-Based Face Recognition Attendance System Agileinfo Techytern Solutions LLP

- Designed a computer vision-based attendance management system using YOLOv8 and LBPH for real-time face recognition.
- Enhanced recognition accuracy to approximately **90%** through training, validation, and model optimization.
- Reduced recognition errors by improving face detection performance.
- Integrated a Django backend with SQLite to support attendance management.

Tech: Python, YOLOv8, OpenCV, LBPH, Django, SQLite, NumPy

AI-Based Job Fraud Detection System Agileinfo Techytern Solutions LLP

- Built an NLP-based fraud detection solution using text classification techniques.
- Achieved approximately **85% prediction accuracy** using TF-IDF, Feature Selection, Random Forest, Decision Tree, and XGBoost.
- Analyzed text data through preprocessing, feature extraction, statistical analysis, and predictive modeling to improve classification performance.
- Managed ETL workflows, backend integration, testing, and model validation using Flask.

Tech: Python, Scikit-learn, Flask, NLTK, Pandas, NumPy, TF-IDF, Random Forest, Decision Tree, XGBoost

EDUCATION

Bachelor of Engineering – Electronics & Communication Engineering

Ponjesly College of Engineering, Nagercoil | 2021 – 2025

CGPA: **8.34/10**

Higher Secondary Certificate (HSC)

Amala Matric Higher Secondary School, Thuckalay | 2020 – 2021

Percentage: **86.1%**

Secondary School Leaving Certificate (SSLC)

Amala Matric Higher Secondary School, Thuckalay | 2018 – 2019

Percentage: **81.8%**

CERTIFICATIONS

- **Full Stack Python Development Internship** – Agileinfo Techytern Solutions LLP
- **Introduction to Generative AI** – Google Cloud
- **Certificate in C++ Programming** – National Council of Vocational and Research Training (NCVRT), Govt. of India
